

<b>Regenerative Surgery for upper limbs</b>	Guest speaker Roger KHOURI
---	-------------------------------

Monday 26<sup>th</sup>, April, 2021

Guy MAGALON

**Roger K. Khouri, MD, FACS** established the Miami Hand Center in 1996. He is world renowned and recognized by his peers as a great teacher, innovator, and contributor to advances in hand surgery and over the past 31 years, as a hand surgeon, Dr. Khouri has performed nearly 50,000 procedures to treat various hand and upper extremity conditions and diseases. He is a pioneer in the field of regenerative surgery.

He will present his ideas on regenerative extremity surgery: Dupuytren's disease, Burn & other contractures, Thumb CMC arthritis, Nerve regeneration, Tenolysis, Padding for Tissue Deficit/atrophy, Wound closure with PALF to replace the FLAP, Raynaud syndrom disease.

**Prof. Guy Magalon** has always been passionate by hand surgery in children and adults. Creating in 1974 in Marseille with his Master, Prof. Henry Bureau, the Emergency Hand Department.

President of the French Society of Surgery of the Hand in 2001. Since 2010, he has been working on hand injuries in Scleroderma and will present all the possibilities of regenerative surgery which is in full expansion.
